

## IN THE BATTLE.

Brattleboro Boy  
At Santiago.

The following letter has been received from Merton Warren by his parents, Mr. and Mrs. Gilman Warren, Young Warren is a member of company C, of the Massachusetts regiment. His regiment was stationed at Fells Church, Va., and was taken from Fort Monroe to Cuba on the auxiliary cruiser Harvard.

On the lines outside of Santiago, I sent you one letter of the boat at Siboney, let me see, that was Friday, I think. The fact is I have forgotten all the days and dates, almost.

We walked ashore late in the afternoon, at Siboney, and stacked arms in a sand heap. It is a little village of about 200, with a few half-starved Cubans wandering around. Plenty of coconut palm rise out of the sand, and the hills around, covered with foliage, present a very pretty appearance.

Little "chacks" of thatch are standing here and there, and hundreds of little naked niggers run about.

We were all glad to get off the boat, and nearly everybody went into the water for a good swim. We found, on landing, that a big battle was being fought, near Santiago. Near six o'clock six mile teams began to arrive with the wounded from the field, and I wandered up to the hospital tents to see the sights. They began to come in so thick that I felt it my duty to help them, so for over an hour I was assisting the poor fellows out of the wagons and over to the tents, some with bullets through the legs and arms, some shot through the body, and worse than that, the poor fellows that had part of the face shot away. They were all cheerful, however, and every new arrival was greeted with cries of "How is it?" and "Are we still gaining?"

They were driving the Spaniards back slowly but surely, and as darkness fell over the fields that were strewn with dead, it was found that nearly five miles of ground had been gained, but with terrible losses on both sides.

At 10:30 we were ordered to take our haversacks, canteens and rubber blankets with two days' rations and go to reinforce our troops. Then followed a long march over hills and mountains for nearly 17 miles in the darkness through the jungle, where huge trees interwove their branches above us, and the lowland trees by vines that grew all over the lowlands.

After wading two brooks and several marshes we were allowed a few hours' sleep, and at 7 o'clock we arose and hurried away to the front. Very soon we began to hear the volleys that were being fired, and suddenly as we rounded a hill the screech of a shell as it flew over our heads warned us that we were getting nearer and nearer to the scene of actual battle. A few minutes later and the steady "pop" and "zip" of bullets told us that we were getting in the range of the Mauser guns.

Hearing a grunt of pain behind me I turned around to find that one of the Donovan boys had been hit in the right hand by a bullet.

So you see Company C was the first to have a wounded man.

You see all the early morning we were marching over the ground that was so hotly contested on the day before. Dozens of dead men strewn the road, and the Spanish bullets began to whistle around our ears, but we are bravely over it now.

Saturday afternoon two companies of our regiment were sent out to support a regiment of regulars, and, along about 10 o'clock in the evening, I was ordered to find bullets flying around like hail, and shells bursting all about us.

We had a hot fight in the moonlight for about 30 minutes and when silence fell once more and we had counted up, we found three more of our company had been slightly wounded. Quite a number of our boys were killed, but I hear that we gained over half a mile of intrenchments, and killed over 500 Spaniards. Not a very bad night's work.

We are on a hill now and our firing line is less than half a mile from Santiago. Our regiment is on the left of the firing line, which runs in a horseshoe shape, for over eight miles.

SUNDAY, AT 12:30 P. M.  
A flag of truce has been hoisted, and since then there has been no firing on either side to amount to anything.

I was up to the head of the line this morning and had a look at Santiago. It is a very pretty place, all low buildings and there is a great variety of color, red, yellow, etc.

Saturday night, during the fight, I lost all my things except rifle and cartridges, so I am rather hard up.

We all sleep in the trenches without anything over or under us. Rain or shine it is just the same, and during the day we sit in the sun and roast.

We get salt pork and hardtack, and as there are no fires allowed on the line we have to eat our pork raw, and I tell you it tastes good when a fellow is hungry. Just try it when you get home, and you will see that it is a nice fat piece, about two inches square, and eat right down and imagine that you are a brave soldier in Cuba. No knives and forks, you know; use your fingers and teeth. We are getting along first rate, though, and all are well. The boys of the gang are playing cards and others are sleeping.

**BODY IN THE LAKE.**  
Clinton Gardner, Eleventh, Drowned Himself After Escaping From a Burlington Sanatorium.

The body of Clinton Gardner of Lebanon, N. H., was found in the lake near the pumping station at Burlington Friday morning. Mr. Gardner was a widely known eleventh, who became mentally unbalanced some time ago, and he was taken to Dr. Sparhawk's sanatorium in Burlington for treatment. He escaped Sunday morning. A reward was offered for his capture, and every effort made to find him. It is thought that he went directly to the lake and drowned himself. Gardner's brother, whose home is in Hartland, was in Burlington when the body was found, having come there to assist in the search. Gardner leaves a wife and four children, the youngest only two weeks old.

Mr. Gardner was well known at Townshend, where he had given instructions to the graduating classes of Leland and Gray seminaries several years. He had also appeared at entertainments in Brattleboro, and had pupils in many towns of New Hampshire and Vermont.

To get relief from indigestion, biliousness, constipation or torpid liver without disturbing the stomach or purging the bowels, take a few doses of Carter's Little Liver Pills, they will please you.

## LETTER FROM COMPANY I.

## Good News From Those in Hospital.

Plenty of Robb News—What It Takes to Fight and Feed Men and Animals—A Santiago Celebration.

CAMP THOMAS, July 18, 1898.  
The week has been one of misery for the ones sick, as rain has fallen nearly all the time for three or four days.

Those out of our company in that condition are doing well. I went over to the division hospital last evening to see the sick and they have an excellent place.

The first thing was to find out the ward they were in. That was not easy, as the government furnishes no errand boys, the clerk looking over the books and seeing Company I boys were in good health, told me to hunt them up. If the books read the other way, I should have been kept out of the line.

There are a great many tents and none numbered, with each tent having eight cots and all filled in most cases with sick boys.

I had to give up the job of trying to find them and running across Dr. Jackson, that genial officer kindly showed me to ward I, where I found "Brook" ready to go out on duty, and "Bing" sitting over four hundred dollars, will you and tell stranger Ware to come over tomorrow and cut my whiskers. There was another lad who will be out before Brookington in the same tent from Company I.

I went next to hunt up Robinson and found him sitting on a log with a "pig" in his mouth and ready to tell me just what Secretary Alger and all the rest were going to do in the next six months.

The cots are good with snow white covers and nice blankets and a light shirt that makes us of the "rough and ready" sort of home and mother.

The boys have an excellent nurse and are sure of the best of care.

Those in the company street are all fine as well. All should be more than careful what they eat, but a few can't let a cart go by without going out to buy a piece of melon, glass of milk, peaches, and the rest. Four or five put the whole course into themselves and wonder why there is no more sympathy shown them.

Very little attention is paid to such cases of sickness now, any more than there will be in the future.

The little brothers at home would show more sense than some of our fellows. Few fellows have been held this week on account of the continuous rains. Some of the time it has more than rained, too. Col. Munroe gave orders to have the boys on guard called in when it rained too hard.

The most of our equipment the regiment here goes on by "express," you might say, as a very large part of it comes that way.

Few can realize the amount of stuff handled in a week at the different commissary buildings.

Capt. McCarty of the disturbing department has given out the encampment began over \$5,000,000 worth of quartermaster's supplies alone.

This does not include the enormous amount of clothing and other supplies issued by Capt. Zaluski.

There has been over \$1,000,000 put into stock for the army commanded by Gen. Brooke and the heavy purchase of horses and mules in this section has caused the price of the former to go from about \$50 to \$150. Good ones are very scarce at this price. Never mind the price of the mules.

The stock here consumes in one month three and one-half million pounds of oats and four and one-half million pounds of hay. Five thousand cords of wood are burned in the same time and all used for cooking purposes.

There are over 10,000 mules and horses in the park, and it is said that the number is about equally divided between each kind. But the brand on the shoulder of each animal is the same, E. S.

The news of Santiago's fall came night before last and lasted about all night. Bands played their regiments, marching almost everywhere in the park, doing all they could to celebrate that most important event.

It is understood the officers do not like the sanitary conditions which surround the regiments and will do all they can to get away, no matter where they go. A high official has remarked that the "other high" ones had come to the conclusion the trouble was not with the water, but with the sinks.

I know there was trouble with the water last evening after 7 p. m. for you couldn't get a swallow of it for love or money around anywhere. It goes that way all the time, and to speak about it does not seem to me to be out of the way. Plenty of mule teams lead all day long, but no water lots of the time.

**Camp Notes.**  
Major Estey and Lieut. Estey spend Sunday with their wives at Chattanooga. Gen. Brooke has been called to Washington and Major General James F. Wade, commander of the Third corps, while that officer is away, will have charge of the army here. Some think that on his return large numbers of troops will be ordered to Porto Rico.

During the severe rains the line officers' horses have suffered much (two are quite sick) and a horse shed is being erected to afford better protection.

One of our wagoners had a watch stolen a few days ago. The thief made quick "time," not having been caught yet.

Dr. Hamilton has returned, being at the head of our regimental hospital once more. He started out to get the "other" regiment Tuesday, but was told there were none. The doctor is a man who seldom takes no for an answer, and followed the trail until he procured 22—11 of each kind that are capable of filtering 21 barrels of water a day. The water is just like that comes from them and we are sorry no more than that amount can be obtained in one day for over 1000 men. But we should be very thankful for what the doctor has already done for us and we shall inform him we are right here.

Private Robb eats little sweet stuff, but last night as he was resting peacefully a can of "Honey Drops" fell off an apology for a shelf upon his head, making him speak right up. It was found his head was cut a little, but he is able to smile that same broad smile this forenoon and be on duty. First blood for Robb in his fight against Spain.

We expect blue shirts today and there has been a requisition put in for a new issue of trousers all through the company.

The following from Company I have been to Chattanooga the present week: Capt. Haigh, Lieut. Putnam and Curtin, Corporal Sullivan and Privates Guillean and Dunley.

What are you going to do with the Cuban Junta after we get through jouncing 'em down here Brother Crosby? Speak up, chile.

P. S. B.  
Hood's Pills cure all liver ills. Mailed for 25c. by C. I. Hood & Co., Lowell, Mass.

## Dr. Miles' Heart Cure

Cures a Prominent Attorney.

M. R. C. PHILLIPS, the leading physician of Boston, N. Y., writes:

"I was discharged from the army on account of ill health, and suffered from heart trouble ever since. I frequently had fainting and smothering spells. My form was bent as a result of the strain, and I was unable to walk in summer, for fear of taking cold. I could not attend to my business. My rest was broken by severe pains about the heart and left shoulder. Three years ago I commenced using Dr. Miles' Heart Cure, notwithstanding I had used so much patent medicine and taken drugs from doctors for years without being helped. The Miles' Heart Cure restored me to health. It is truly a wonderful medicine and it affords me much pleasure to recommend this remedy to everyone."

Dr. Miles' Heart Cure restores health. It is sold by all druggists under a positive guarantee, first bottle benefits or money refunded. Book on diseases of the heart and nerves free. Address, DR. MILES MEDICAL CO., Elkhart, Ind.

## PROF. CLARK'S WORK

At the Head of the Maryland Geological Survey.

The work of the Maryland geological survey, which is being carried on under the direction of Prof. William Bullock Clark, of the Johns Hopkins university, state geologist, is being pushed with vigor in several sections of the state, says the Baltimore, Md., Sun of July 15 in a column article. A large area will be thoroughly surveyed during the present summer. At the same time, the results of the previous work are being rapidly brought together for publication, and the second volume of the survey reports, well elaborated over earlier plans, will shortly appear.

The topographic work which is being carried on under an act of the legislature, in cooperation with the United States geological survey, is making rapid strides in the mountainous portions of western Maryland, and Garrett and Allegany counties will be completed before the close of the field season. This work is being pushed in several sections of the state, says the Baltimore, Md., Sun of July 15 in a column article. A large area will be thoroughly surveyed during the present summer. At the same time, the results of the previous work are being rapidly brought together for publication, and the second volume of the survey reports, well elaborated over earlier plans, will shortly appear.

## VALLEY FAIR PLANS.

Some Remarkable Features and a Spectacular Entertainment Costing \$1000.

Arrangements are well under way for an annual Valley Fair which will be held this year Sept. 28 and 29. The trotting circuit, which has just been completed, includes Lebanon, N. H., White River Junction, Keene, N. H., Athol and Greenfield, Mass., and Brattleboro. Large purses will be given and a large number of entries are assured, so that the afternoon's entertainment is guaranteed.

The exhibit of thoroughbred horses this year will be remarkable. In this department will probably be shown the famous colts owned by E. H. Jordan of Boston, who has expended over \$200,000 in importations.

The cattle exhibit, as heretofore, will include the best herd of each breed in New England and New York.

A sufficient number of entries in the poultry department have already been received to put the exhibit at the head of all poultry exhibits in this country.

Negotiations are now in progress, and it is expected that they will be completed in a few days, for a special attraction which will give continuous entertainment from 10 o'clock in the morning to 1:30 in the afternoon. In this special department \$1000 will be spent, which will give the patrons of the fair the kind of entertainment for which they would pay \$1.50 in Boston or New York.

Preparations in all the departments are rounding out in a manner which gives promise that the fair will equal any that has ever been held. It will be conducted on the same lines as heretofore, being the only fair of its kind in the state, and which has no fairs or other obnoxious features.
